

INSTALLATION AND SAFETY INSTRUCTIONS

FOR YOUR SAFETY

WARNING: BE SURE THE ELECTRICITY TO THE WIRES YOU ARE WORKING ON IS SHUT OFF; EITHER THE FUSE REMOVED OR THE CIRCUIT BREAKER SET AT OFF.

GENERAL

You don't need special tools to install this fixture. Be sure to follow the steps in the order given. Read instructions carefully. **If you are unclear as to how to proceed, consult a qualified electrician.**

ASSEMBLY

STEP 1:

Carefully remove the fixture from the carton and check that all parts are included, as shown in figure 1 and 2. Be careful not to misplace any of the screws or parts which are needed to install this fixture.

STEP 2:

Choose arm location (up or down) and proceed with instructions.

STEP 3:

Install bottom nipple to socket harp.

**Installation And
Safety Instruction
HC-867 092904**

Line art shown may not exactly match the fixture enclosed. However, the installation instructions do apply to this fixture. Fill In Item Number On Carton And File This Sheet For Fixture Reference. ITEM# _____

IMPORTANT: DO NOT ATTACH FIXTURE DIRECTLY TO OUTLET BOX.

STEP 1:

Insert fixture mounting screws (I) in threaded holes of mounting bar (J). Run screws all the way down to the heads. (See Fig. 2).

STEP 2:

Place mounting bar (J) against outlet box and fasten mounting bar (J), to outlet box with outlet box screws (not supplied).

STEP 3:

A. Take note of the wire(s) on your fixture. Identify which group your fixture wire(s) falls into and connect the wires according to the directions, see illustration.

*Note: When parallel wire (SPT I & SPT II) is used, the tracer wire is square shaped or ridged and less tracer wire is round in shape or smooth. (Seen best when viewed from wire end.)

- B. Take your fixture wire(s) from group A and place evenly against the black wire from the outlet box. **DO NOT** twist wires together before using wire connectors.
- C. Fit a wire connector (not supplied) over the wires and screw the connector clockwise until you feel a firmness.
- D. Try gently to pull the connector off the wires. If you can pull the connector off, carefully re-do steps 5 and 6, as above, and check again for a firm connection.
- E. Connect the fixture wire from group B to the white wire from the outlet box in the same manner.

STEP 4:

GROUNDING INSTRUCTIONS: The green grounding screw is to be inserted into the hole with two raised dimples provided on the mounting bar. Wrap the ground wire from the fixture (if supplied) and the ground wire from the outlet box (bare metal or green insulated wire) around the green grounding screw on the mounting bar. If uninsulated wire is on the mounting bar, connect the ground wire from the fixture (if supplied) and the outlet box to it using a small wire connector (not supplied).

NOTE: Underwriters Laboratories (U.L.) does not require all fixtures to have ground wires. These fixtures still meet all U.L. specifications. The listing mark of Underwriters on the product identifies products manufactured under its listing and Follow-Up Service Programs.

NEVER CONNECT GROUND WIRE TO BLACK OR WHITE POWER SUPPLY WIRES.

FINAL ASSEMBLY

STEP 1:

After wires are connected, tuck them carefully into outlet box. Position fixture backplate (N) allowing mounting screws (I) to protrude through holes in backplate (N). Push fixture firmly against the wall and secure in place with cap nuts (F).

STEP 2:

Install lamp.

STEP 3:

Place glass over socket assembly and secure with cap (P) and ball finial (H)

STEP 4:

Remove plug from bottom weephole.

CLEANING

To clean, wipe fixture body with a soft cloth. Clean glass with a mild soap. Do not use abrasive materials such as scouring pads or powders, steel wool, or abrasive paper.

ORDERING PARTS

Keep this sheet for future reference, and in case you need to order replacement parts. All parts for this fixture can be ordered from place of purchase. Be sure to use exact wording from illustration when ordering parts.

WET LOCATION

NOTE: FOR FIXTURES LABELED FOR WET LOCATION AND USED OUTDOORS.

CAUTION: To reduce the risk of electrical shock, provide a watertight seal between the fixture and the mounting surface by using a silicone or similar caulking.
